Operational Update

Following its successful admission to the Official List of ASX Limited on 28 July 2017, Spectur Limited ("Spectur" or the "Company") is pleased to provide an operational update to the market.

East Coast Expansion

The Company has begun its expansion into Victoria via the opening of a Melbourne facility. The office incorporates its own internal research and development department, which will be pivotal in allowing the Company to develop new security surveillance products and systems as well as add new functionality for its existing products and systems.

Senior sales and support staff have also been employed to grow the business and provide value added services to clients, by offering on site assessments and installations directly from the Spectur team.

Target Industry Diversification

Spectur has primarily targeted the Australian construction, civil engineering and mining and energy industry. Recent sales of its solar security surveillance products to a national utility provider in Melbourne has marked an expansion into the market segment of Critical Infrastructure. The Company intends to leverage off its initial success and develop new sales opportunities within this market segment which includes, energy and telecommunications supply assets, gas, electricity and water infrastructure, airports and railways.

Perth Premises

New leasehold premises have been secured in Cockburn Central, WA, to accommodate expansion of the Company's production facilities. The move to the new premises is anticipated to occur mid-late August 2017.

Expansion plans

As per section 2.6B of the business plan outlined in the Company's prospectus dated 19 June 2017 ("Prospectus"), the Company is also considering opportunities for acquisitions and joint ventures in the marketplace that may be synergistic to its business, and will advise the market should such an opportunity arise.

Unaudited Revenue FY-17

As per section 2.8D of the Prospectus, unaudited revenue for the 12 months to 30 June 2017 is \$1,332,981 which is slightly above forecast revenue of \$1,325,000.

Yours sincerely,

A handwritten signature in blue ink, appearing to read 'Richard Wilkins', is positioned above the printed name.

Richard Wilkins
Executive Chairman

About Spectur Limited

Spectur Limited is an Australian based company which designs, develops, manufactures and installs security and surveillance systems for powered and non-powered / remote locations. Spectur's core product is the HD4 security camera system, a solar powered battery backup security system which is remotely accessed and connected via 3G/4G technology.

The Company has focused on growing its revenues by increasing its current market share in Australia for solar-powered security surveillance products and by penetrating other key strategic markets.
