

Trading Update

Highlights:

- **Accelerated sales momentum continues with revenues for first two months of current quarter exceeding sales for the entire previous quarter**
- **Continues the strong growth experienced in the September quarter**
- **Larger and/or repeat orders from national clients contribute to accelerated sales and rentals following Spectur's opening of offices on the east coast**
- **Recent ramp up of capacity at Perth facility has enabled the Company to meet increased demand with existing hardware stock on hand**
- **Planned opening of Spectur's Sydney office in the first quarter of 2018 has potential to drive a further increase in sales.**

7 December 2017: Australian-based remote security monitoring systems and cloud based technology solutions company ('Spectur' or 'the Company') (**ASX:SP3**) is pleased to provide the following trading update up for the current quarter to date.

Spectur continues to experience strong sales and rental growth with revenues for the first two months of the current quarter already exceeding total sales revenue for the September quarter of \$441,000.

This continues the strong growth experienced in the September quarter and comes off the back of a number of new deals announced recently, including the agreement to provide Spectur's state-of-the-art HD4 camera systems to the automotive shutdown project in Geelong, Victoria.

December is traditionally a seasonally strong period for sales in the lead up to the Christmas break, however Spectur is also observing an increase in non-seasonal sales driven by uptake from new and existing customers. This includes a number of larger orders from national clients that have arisen as a direct result of the Company's east coast expansion.

Spectur has been able to meet the increased demand due to the decision to ramp up production capacity in October 2017 at its Perth facility. This has ensured that the Company has sufficient hardware stock on hand to meet the demand and has also

reduced the need for an immediate increase to fixed production costs to meet the increased sales.

The Company continues to move forward with the planned opening of its Sydney operations which will take place in the first quarter of 2018. Spectur considers that the commencement of NSW operations has the potential to drive a further increase in sales off the back of the success of the Victorian and Queensland expansions.

While the Company is targeting strong quarter-on-quarter growth in 2018, the month of January is traditionally a period of lower sales volume with many clients running smaller staffing levels and less procurement taking place.

Investors should be aware that revenues are not indicative of overall financial performance or profitability. Full disclosure of the quarterly cash flow for the December 2017 quarter will be released in January 2018 as per ASX reporting requirements.

Peter Holton, Managing Director Spectur Ltd commented:

"This is a really exciting period for our Company with the demand for our innovative hardware and cloud-based security solution continuing to increase as we reach new potential clients across the east coast off the back of our expansion in Victoria and Queensland."

"We feel like we are still only scratching the surface in terms of the potential of our product to be used across a wide range of industries and with the opening of our NSW operations and a number of new products set to be launched in early 2018 we are looking forward to a big year ahead."

ABOUT SPECTUR

Spectur Limited is an Australian-based company which owns the rights to its innovative hardware and disruptive cloud based IOT and security systems which operate in Australia. The two key industries that Spectur currently services are the building/construction/civil industry and the critical infrastructure industry. The Company's focus is to service the commercial, industrial and governments sectors. Spectur's core product is the HD4 security camera system and associated cloud based platform. The HD4 is a solar powered battery backup security system which is remotely accessed and connected via 3G/4G technology which is connected to the cloud based platform. The Company is rapidly implementing a growth plan to firstly grow revenues and market share in the Australian security surveillance sector and, secondly to penetrate other key strategic markets.

FORWARD-LOOKING STATEMENTS

This announcement contains forward-looking statements which are subject to elements of uncertainty, risk and other factors which could cause the actual results or outcomes to differ materially from those stated. These statements are based on an evaluation of current economic, contractual and operating conditions, as well as assumptions regarding future events. These events are, as at the date of this announcement, expected to take place, but there cannot be any guarantee that such events will occur as anticipated, when anticipated or at all given that many of the events are outside Spectur's control.

Accordingly, neither Spectur nor any of its directors, officers, employees, contractors or agents, gives any assurance that the results, performance or achievements expressed or implied by the forward-looking statements contained in this announcement will actually occur as and when anticipated.
